Steady stream of income for a lifetime.

Scenario 1:

John (age 40, non-smoker) is married and about to have kids. He wants to ensure that he will have a consistent stream of income so that his wife and kids can continue to live comfortably for many years to come. He purchases Esteem income and pays a single premium of S\$1 million. Upon the 13th policy month, he receives lifetime monthly income consisting of a guaranteed and non-guaranteed amount. John passes away at the age of 85. His children and wife will receive a payout of S\$1,020,000¹.

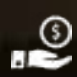

The scenario(s) above are for illustration purposes only.

¹The above illustrated values use bonus rates assuming an illustrated investment return of 4.25% per annum. Assuming an illustrated investment rate of return at 3.00% per annum, the monthly income John receives from 13th to 36th policy month (inclusive) will be S\$1,000 and the monthly income he receives from 37th policy month until he is age 85 (inclusive) will be S\$1,817. The total monthly income he receives will be S\$939,600 and the total death benefit his family receives will be S\$910,000. The two rates, 4.25% per annum and 3.00% per annum, are used purely for illustrative purposes and do not represent the upper and lower limits on the investment performance of the participating fund. Bonus rates are not guaranteed and actual benefits payable may vary according to the future performance of the participating fund. Past performance or any forecasts are not necessarily indicative of the future or likely performance of the participating fund. Total monthly income comprises of both a guaranteed and non-guaranteed amount, and varies depending on the payout period. Refer to the illustration on monthly income for more details.
