Here's how it works:

James (age 50, non-smoker), plans to accumulate savings regularly to fund his financial goals in 10 years' time. As he has other financial commitments, he prefers a policy with a short premium term.

With **eSAVE assure 5 presto**, James sets aside \$10,074 annually for the first 5 years. Upon maturity of the policy, he will receive a lump sum of \$62,603* with a projected total maturity yield of 2.75%* per annum.

*The illustration assumes a projected investment rate of 4.75% per annum. Bonus rates are not guaranteed and will vary according to the future performance of the participating fund. The example illustration includes the premium of the compulsory rider.
