4. Investment Objectives, Focus & Approach

The investment objective of the Fund is to provide strong returns over the long term by investing primarily in a concentrated, unconstrained global equity portfolio.

The Fund may also invest in other transferable securities, money market instruments, cash and cash equivalents.

A typical investor in the Fund will seek exposure to growth investments over the long term and will not look to an investment in the Fund as a regular source of income nor be concerned about short term volatility and performance.

There can be no assurance that the Fund will achieve its investment objective.

The Fund is expected to experience high volatility at times as a result of its investment strategies.

An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Fund will seek to achieve its objective primarily through investment in a concentrated but diversified portfolio of equity securities typically comprising of between 30 and 60 holdings which shall principally be listed, traded or dealt in on one or more of the Regulated Markets referred to in Schedule II. The equity securities in which the Fund will invest shall primarily consist of common stocks and other transferable securities such as convertible securities, preferred securities, participation notes, convertible preferred securities, warrants and rights. The equity securities in which the Fund may invest will not be selected from any particular industry sector or from any particular country and will typically have a market capitalisation of more than U.S. \$4 billion at the time of purchase.

The investment strategy of the Fund is to invest primarily in global equities which are listed, traded or dealt in on Regulated Markets with the aim of producing strong returns over the long term. Stocks with strong growth potential are selected on an individual stock selection basis by a dedicated team of portfolio managers, drawing on their own research and that of other investment teams at Baillie Gifford.

Cash is a residual element of the investment process. Cash may be held on deposit by the Fund. Cash equivalents may also be held by the Fund from time to time. Cash equivalents are commercial paper, banker's acceptances, certificates of deposit and government securities or securities issued by any Supranational Organisation, provided these securities are listed, traded or dealt in on a Regulated Market referred to in Schedule II and are rated investment grade or better by a Recognised Rating Agency. Cash deposits and cash equivalents held by the Fund will not generally exceed 10 per cent. of its Net Asset Value, but in exceptional circumstances (for example in an uncertain market environment) the Fund may hold in excess of 10 per cent. of its Net Asset Value in cash or cash equivalents.

Investments in Emerging Market Countries may be acquired subject to a limit of 50 per cent. of the Net Asset Value of the Fund.

The Fund shall not acquire equity securities which are listed, traded or dealt in markets in Russia but may acquire the securities of Russian issuers which are listed, traded or dealt in on Regulated Markets in non-Emerging Market Countries. In relation to investment in China, the Fund may have exposure to Permissible PRC Instruments directly via the Stock Connects and/or through the FII Scheme or indirectly via investments in structured notes, participation notes, equity-linked notes or Eligible Collective Investment Schemes that invest primarily in Permissible PRC Instruments, structured notes, participation notes, equity-linked notes and similar financial instruments. The underlying assets of the structured notes, participation notes and equity-linked notes must consist of securities issued by companies quoted on Regulated Markets in China, and/or the performance of which is linked to the performance of securities issued by companies quoted on Regulated Markets in China.

The Fund will not invest more than 10 per cent. of its Net Asset Value in units or shares of Eligible Collective Investment Schemes, including exchange traded funds. The Eligible Collective Investment Schemes in which the Fund may invest will have similar investment objectives and policies to the Fund.

The Fund may invest in currency forwards to reduce currency risk but not to take active positions on currency. Such use will be for efficient portfolio management purposes in the manner described under the heading "Investment Techniques and Instruments".

Other than the Fund's investment in convertible securities, preferred securities, participation notes, convertible preferred securities, warrants and rights for investment purposes, the Fund may only use financial derivative instruments referred to under the heading "Investment Techniques and Instruments" for efficient portfolio management purposes. To the extent that the Fund uses financial derivative instruments which create leverage, the limits on global exposure described in Schedule IV under the heading "Cover Requirements" apply. In particular, leverage will be measured using the commitment approach, whereby such leverage cannot exceed 100 per cent. of the Net Asset Value of the Fund. For a fuller description of the risks involved, please see the section entitled "Risk Factors". A

financial derivative instruments risk management process, setting out the types of financial derivative instruments in which the Fund may invest has been filed with the Central Bank in accordance with the UCITS Rules. Derivatives, in general, involve special risks and costs and may result in losses to the Fund.

Other than as expressly permitted pursuant to the Fund's investment policy set out above, the Fund will not actively take positions in securities which contain embedded derivatives but it may acquire them passively through corporate actions, for example, where the Fund is issued with securities pursuant to a rights issue in respect of a pre-existing investment and those securities have warrants attached to them. The Investment Manager does not expect such embedded derivatives to be leveraged.

The Fund's performance (after deduction of costs) is measured against the MSCI ACWI Index (the "Index"), details of which are set out in Schedule VIII. The Fund seeks to Materially Outperform the Index over the long term. Details of the Fund's performance relative to the Index are available in the Fund's KIID and are for illustrative purposes only. There is no guarantee that the Fund's performance will match or exceed the Index over the long term and for any given year the Fund may either outperform or underperform the Index.

The Fund is actively managed and the Investment Manager uses its discretion to invest in assets which are not included in the Index or with weightings different to that of the Index. For the avoidance of doubt, the Investment Manager considers that the Index is not used for the purpose of determining or constraining the composition of the Fund's portfolio.

The Base Currency of the Fund is U.S. Dollars.
