| KEY RISKS | |
| WHAT ARE THE KEY RISKS OF THIS INVESTMENT? <p>The value of investments and the income from them, and therefore the value of and income from Shares of the ILP Sub-Fund, can go down as well as up and you may not get back the amount you invest. These risk factors, among others, may cause you to lose some or all of your investment</p> | Refer to "Risks" of the Singapore Prospectus for information on investment risks of the Portfolio. |
| Market and Credit Risks | |
| <p>You are exposed to Country Risks in the US. Investments in issuers located in the US may have more market, political and economic risks because of particular factors affecting that country.</p> <p>You are exposed to Credit Risks. The Portfolio will invest in fixed-income securities (including bonds) issued by companies and other entities and the Portfolio will be subject to the risk that a particular issuer may not fulfil its payment or other obligations in respect of such fixed-income securities. Generally, debt instruments with a lower credit rating or that are unrated are more susceptible to the credit risk of the issuers. In the event of a default or credit rating downgrading of the issuers of the fixed income securities, the Portfolio's value may be adversely affected and investors may suffer a substantial loss as a result.</p> | |
| Liquidity Risks | |
| <p>You are exposed to liquidity risks of the underlying fund's investments. Investments in illiquid assets or assets which become illiquid could prevent the Portfolio from promptly liquidating unfavourable positions and, therefore, result in losses to the Portfolio and corresponding decreases in the NAV of the Shares.</p> <p>The Shares are not listed and can only be realised on Business Days. There is no secondary market for the Shares. All realisation requests should be submitted in the manner set out in the Singapore Prospectus.</p> <p>You may not be able to redeem when a redemption limit is imposed or when redemption is suspended. A redemption limit may be imposed if requests are received to redeem more than 10% of the Shares of the Portfolio outstanding. Further, your right to redeem may be temporarily suspended under certain circumstances</p> | |

| Product-Specific Risks | | | |
|--|--|-----------------|--|
| <p>You are exposed to Derivatives Risks. The Portfolio is entitled to use derivative instruments for hedging and EPM purposes which may involve additional risks different from, and, in certain cases, greater than, the risks presented by more traditional investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk and leverage risk. In adverse situations, the Portfolio's use of derivative instruments may become ineffective in hedging or EPM and the Portfolio may suffer significant losses. The failure of a counterparty to a derivative contract to comply with the terms of that contract could cause the Portfolio to suffer a loss.</p> <p>You are exposed to Fixed Income Securities Risks. As interest rates rise, bond prices fall and vice versa – long-term securities tend to rise and fall more than short-term securities. The Portfolio will invest in fixed-income securities where their value will change in response to fluctuations in interest rates and currency exchange rates, as well as changes in credit quality of the issuer.</p> | | | |
