Product-Specific Risks	
<p>You are exposed to foreign exchange / currency risk.</p> <ul style="list-style-type: none"> Where investments are denominated in currencies other than SGD (the denomination of the ILP sub-fund), exchange rate fluctuations against the SGD may affect the value of Units. The ILP sub-fund manager may hedge the foreign currency exposure of the ILP sub-fund and may adopt an active currency management approach. Foreign currency exposure may not be fully hedged depending on the circumstances of each case, which include the outlook, hedging costs and market liquidity of the relevant currency. <p>You are exposed to political risk.</p> <ul style="list-style-type: none"> Investments by the ILP sub-fund may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation and other restrictions and controls imposed by the relevant authorities in the relevant countries. <p>You are exposed to debt securities risk.</p> <ul style="list-style-type: none"> Investments in debt securities are subject to interest rate fluctuations and credit risks, such as risk of default by issuers. Prices of debt securities may go up or down in response to interest rate fluctuations. Adverse changes in the financial condition of the issuer of the debt securities, or in general economic conditions, or both, or an unanticipated rise in interest rates, may increase the potential for default by the issuers of these securities. <p>You are exposed to single country, sector and regional risk.</p> <ul style="list-style-type: none"> Investors should be aware that while investments in single country, single sector or regional funds may present greater opportunities and potential for capital appreciation, they may be subject to higher risks as they may be less diversified than a global portfolio. <p>You are exposed to derivatives risks.</p> <ul style="list-style-type: none"> An investment in a FDI (including foreign exchange forward contracts) may require the deposit of an initial margin and additional deposit of margin on short notice if the market moves against the investment position. If the required margin is not provided in time, the investment may be liquidated at a loss. Therefore, it is essential that investments in FDIs are monitored closely. The ILP sub-fund manager have controls for investments in FDIs and have in place systems to monitor the FDI positions of the ILP sub-fund. <p>You are exposed to the risks relating to distributions.</p> <ul style="list-style-type: none"> Dividend/interest income of the ILP sub-fund may be adversely affected by (amongst others) investee entities suffering unexpected losses and/or paying lower than expected dividends. Distributions may also be made out of capital which may amount to a reduction of part of your original investment and may result in reduced future returns to you. Payment of distributions (whether out of capital or otherwise) may have the effect of lowering the ILP sub-fund's NAV. <p>You should be aware that the ILP sub-fund may be exposed to other risks of an exceptional nature from time to time.</p>
