KEY FEATURES OF THE ILP SUB-FUND

WHAT ARE YOU INVESTING IN?

- You are investing in an ILP sub-fund that feeds 100% into the fund of “The Company”, a public limited company incorporated in Ireland as an investment company with variable capital constituted as an umbrella fund with segregated liability between sub-funds under the laws of Ireland. The Company is authorized and regulated by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).
- The investment objective of the ILP sub-fund is to seek to maximise current income while preserving capital.
- The Base Currency of the ILP sub-fund is Euro.
- Currently, the Directors anticipate making dividend distributions in respect of the CHF Distributing Shares, EUR Distributing Shares, GBP Distributing Shares, JPY Distributing Shares, NOK Distributing Shares, SEK Distributing Shares and USD Distributing Shares of the ILP sub-fund. Accordingly, any income arising in respect of these Share Classes will be distributed to investors in the ILP sub-fund in accordance with their respective shareholdings. Notwithstanding the above, the Directors do not expect to declare a dividend in respect of any Class where it would be uneconomical to pay such dividend to Shareholders or it is otherwise not considered to be in the best interests of the ILP sub-fund.

Refer to Appendix 1 stated in the Prospectus and the section headed “Investment Objectives and Policies” for further information on features of the ILP sub-fund.

Investment Strategy	
<ul style="list-style-type: none"> The investment policy of this ILP sub-fund is to purchase high quality, fixed or floating rate investment grade short term instruments including bonds and other instruments issued by governmental, quasi-governmental and corporate issuers predominately in developed countries such as, without limitation, commercial paper, bank obligations and corporate debt obligations. The ILP sub-fund will generally invest in commercial paper or other money market instruments whose short term rating is, at time of purchase, Prime1 by Moody's or A-1 or better by S&P or F1 or better by Fitch, or other debt obligations whose long-term rating is Aa3 or better by Moody's or AA- or better by S&P or Fitch. If there is no rating for the debt security, then the ILP sub-fund manager must determine that the debt security is of comparable quality to equivalent issues of the same issuer rated at least AA- or Aa3. In the event of a downgrade of the above mentioned instruments below the minimum credit ratings described above, the ILP sub-fund manager will determine, in its discretion, whether the ILP sub-fund should continue to hold or dispose of such instrument in consideration of the best interests of the ILP sub-fund. The instruments will mature in five (5) years or less from the date of settlement of purchase. The portfolio maintains an average maturity of five (5) years or less. The ILP sub-fund currently intends to use derivative instruments to hedge foreign currency exposure. For efficient portfolio management purposes the ILP sub-fund may also acquire forward foreign currency contracts and futures. The ILP sub-fund may use repurchase agreements for efficient portfolio management purposes. It is not the ILP sub-fund's current intention to utilize any derivative instruments other than futures and forward foreign currency contracts. 	Refer to Appendix 1 stated in the Prospectus and the section headed "Investment Objectives for further information on the investment strategy of the ILP sub-fund.

KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? <p>The value of the product and its dividends or coupons (if any) may rise or fall.</p> <p>An investment in the ILP sub-fund is meant to produce returns over the long term. You should not expect to obtain short term gains from such an investment.</p> <p>You should consider the risks of investing in the ILP sub-fund, which may cause You to lose some or all of Your investment.</p>	Refer to paragraph 6 "Risks" stated in the Prospectus for further information on risks of the ILP sub-fund.
Market and Credit Risks	
<ul style="list-style-type: none"> You are exposed to market risk. The investment returns of the ILP sub-fund are subject to normal market fluctuations and the risks inherent in investment in local and international securities markets and there can be no assurances that appreciation or preservation will occur. You are exposed to interest rate risk. Fixed income securities are subject to interest rate risk because the prices of fixed income securities tend to move in the opposite direction of interest rates. When interest rates rise, fixed income security prices generally fall. When interest rates fall, fixed income security prices generally rise. 	

<ul style="list-style-type: none"> • You are exposed to foreign exchange risk. Where the ILP sub-fund engages in foreign exchange transactions which alter the currency exposure characteristics of its investments, the performance of the ILP sub-fund may be influenced by movements in exchange rates as currency positions held by the ILP sub-fund may not correspond with the securities positions held. The NAV per Share of the ILP sub-fund will be computed in its Base Currency whereas the investments held for the account of the ILP sub-fund may be acquired in other currencies. The ILP sub-fund's NAV may change significantly when such other currencies strengthen or weaken against the Base Currency. The ILP sub-fund manager implements a passive hedging strategy to hedge the foreign currency exposure. • You are exposed to credit risk. The ILP sub-fund will have a credit risk on the issuer of debt securities in which it invests which will vary depending on the issuer's ability or willingness to make principal and interest payments on the obligation. A downgrade of an issuer's credit rating or a perceived change in the issuer's financial strength may affect a security's value, and therefore, impact the ILP sub-fund's performance. The ILP sub-fund will also have a credit risk on the parties with which it trades. 			
Liquidity Risks			
<ul style="list-style-type: none"> • The ILP sub-fund is not listed in Singapore and there is no secondary market for its Shares. All redemption requests should be made to the fund manager and You can only redeem Your investment on a Dealing Day through the ILP sub-fund. • You are exposed to liquidity risk. Liquidity risk exists when particular portfolio investments are difficult to purchase or sell. To the extent that the ILP sub-fund holds illiquid investments, the ILP sub-fund's performance may be reduced due to an inability to sell the investments at opportune prices or times. 			
Product-Specific Risks			
<ul style="list-style-type: none"> • You are exposed to derivatives risk. The ILP sub-fund may use futures, forward currency contracts, options and swaps for efficient portfolio management purposes including for hedging against market movements, currency exchange or interest rate risks or otherwise. The ILP sub-fund manager's ability to use these strategies may be limited by market conditions, regulatory limits, legal risk, where the enforceability of a financial derivative instrument contract may be an issue, settlement risk and tax considerations. Hedging with derivatives may increase expenses, and there is no guarantee that a hedging strategy will work. While hedging can reduce or eliminate losses, it can also reduce or eliminate gains or cause losses if the market moves in a manner different from that anticipated by the ILP sub-fund or if the cost of the derivative outweighs the benefit of the hedge.
