These risk factors may cause you to lose some or all of your investment and your principal may be at risk.</p>	<p>Refer to the “Risk Factors” and “Suspension of Dealings” sections of the Singapore Prospectus for further information.</p>
Market and Credit Risks	
<p>Price risk – The shares, as well as the securities acquired by the fund, are subject - as are any securities - to price risk. The risk of a decrease in the value of Shares, as well as the potential for an increase in their value, is usually greater in the case of an equity fund than in the case of a bond fund.</p> <p>Equity risk – Companies issue common shares and other kinds of equity related securities to help pay for their operations and financial necessity. Equity securities can go down in price for many reasons.</p> <p>Exchange rate risks – the holders are subject to this risk due to the different currencies which may be involved, that is the currency with which holders have purchased shares, the reference currency of the ILP Sub-Fund or Class concerned and the currency of the securities in which the ILP Sub-Fund invests.</p> <p>Counterparty risk – in entering into transactions which involve counterparties, there is a risk that a counterparty will wholly or partially fail to honour its contractual obligations. In the event of a default, bankruptcy or insolvency of a counterparty, the ILP Sub-Fund could experience delays in liquidating the position and significant losses. The ILP Sub-Fund may only be able to achieve limited or possibly no recovery in such circumstances.</p> <p>Liquidity risk - the Company may invest in securities and instruments that can be relatively illiquid which may cause the Company to lose money or incur extra costs when selling those securities.</p>	

Liquidity Risks			
<p>The Sub-Fund is not listed and you can redeem only on Valuation Days.</p> <p>There is no secondary market for the ILP Sub-Fund. All redemption requests should be made to the Administrative Agent through the Singapore distributor through whom the Shares were purchased.</p> <p>If redemption requests are received in respect of any single Valuation Day for redemptions beyond a certain limit, the Company may delay the calculation of the redemption price and payment may be made, with the approval of the Shareholders concerned, in specie</p> <p>In addition, you may not redeem your Shares during any period where redemption is suspended.</p>			
Product-Specific Risks			
<p>Disruptive Innovation Risk – companies that the Investment Manager believes are capitalising on disruptive innovation and developing technologies to displace older technologies or create new markets may not in fact do so. These companies may also be exposed to risks applicable to sectors other than the disruptive innovation theme for which they are chosen, and the securities issued by these companies may underperform the securities of other companies that are primarily focused on a particular theme. The ILP Sub-Fund may invest in a company that does not currently derive any revenue from disruptive innovations or technologies. The success of a disruptive innovation or technology may not affect the value of the equity securities issued by the company.</p>
