KEY FEATURES OF THE ILP SUB-FUND

WHAT ARE YOU INVESTING IN?

- You are investing in an ILP Sub-Fund which feeds 100% into BNP Paribas Funds Aqua, a UCITS compliant sub-fund constituted in Luxembourg.
- The ILP Sub-Fund aims to provide you with returns through medium term capital growth by investing primarily in water related companies. The fund's investment objective aims to generate a positive absolute return by actively managing a portfolio of negotiable debt securities on world markets.
- If you hold distribution shares, you may receive monthly or yearly distributions in accordance with the particular distribution share class. This is at the discretion of the directors and subject to the approval of the shareholders. However, no distribution will be carried out if it is not in your interest nor in that of other shareholders to distribute a dividend at that particular market condition. You should note that where distributions, calculated on the basis of the benchmark dividend yield, exceed the fund's income, such distributions will be made up of a capital component and will cause a decrease in the net asset value of the sub-fund.
- Capitalisation shares will retain income to reinvest.
